

Ruf Duck® rainwear

Question: “It feels Light! Is it Tough?”

The Ruf Duck fabric is made to our specification on the East Coast. We selected the oxford weave because it is stronger than conventional weaves. The nylon fabric is coated with a proprietary formulated polyurethane waterproof film to our specified thickness. The waterproofing is on the inside, protected from wear. A heavier fabric does not equate to a stronger fabric.

The result is a unique, long-lasting garment that has these qualities:

1. Waterproof ----- 100%
2. Abrasion resistance ----- excellent
3. Puncture resistance ----- excellent
4. Tear resistance ----- very good

It's not indestructible but professionals use it with confidence and pride.

Answer: “Yes! Durable and Comfortable, too!”

A quality tool for the working person. Choose size that will fit over the bulkiest clothing that will be worn. Designed to allow easy movement of the body and natural ventilation as you work. Proper fit will insure comfort in this USA made, 100% waterproof garment.
